Message from the Guest Editor

Dear Colleagues,

Despite significant advances in pharmacotherapy and therapy, heart failure remains a major cause of mortality and morbidity, and is a growing healthcare burden worldwide. However, there has been a growing understanding of the underlying disease mechanisms of heart failure, although there remain gaps in the knowledge, particularly with respect to acute decompensated heart failure, heart failure with preserved ejection fraction, and in the management of prevalent comorbidities that contribute to its pathophysiology, such as diabetes and anaemia. This Special Issue will focus on recent research and developments in these areas.

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Medicine, Research and Experimental)
