Message from the Guest Editor

Dear Colleagues,

Mathematical modeling and the application of GIS are also important tools in predicting infectious diseases, identification of at-risk population, and the evaluation of interventions. This Special Issue on "Infectious Disease Epidemiology" will cover original articles and review articles related to global burden of infectious diseases, antimicrobial resistance, emerging diseases, social aspects and economic burden of diseases, laboratory identification, clinical trials, community interventions, GIS application, and mathematical models.

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, Diseases is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2023).
