COVID-19 and Global Chronic Disease

Message from the Guest Editor

The World Health Organization was informed by Chinese authorities of an outbreak of a novel strain of coronavirus called SARS-CoV-2. The infected individuals may experience mild illness and recover while others can become seriously ill and die. Chronic diseases such as obesity, diabetes, and neurodegenerative diseases are expected to increase in the next 30 years and non-alcoholic fatty liver disease (NAFLD) to reach between 30–40% of the global population. These chronic diseases are associated with an altered immune system that leads to severe illnesses after virus infections. In the developing world, the major concern with COVID-19 infection is that it may lead to multiple organ disease syndrome and the severity of COVID-19 in these individuals may be associated with gene inactivation and linked to programmed cell death. The role of diet, nutrition, and appetite control may be critical to stabilize the immune system and reverse the severity of the disease connected to the global chronic disease epidemic. In 2021, we would like to publish various articles as indicated in the research field.

About the Journal

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Omar Cauli

Frailty and Cognitive Impairment—FROG Research Group, University of Valencia, 46010 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
