submissions:

**closed (15 January 2023)**

### Message from the Guest Editor

Dear Colleagues,

As we well know, the Creator had an inordinate fondness for beetles (J. B. S. Haldane), and so far almost a half million species of this largest animal order have been described. Hundreds of new beetle species are found around the world every year. I have been interested in these beautiful creatures since the 1970s, for more than 40 years. Over the course of these years, I have been a witness of the decline of insect biodiversity in the Central European fauna and the degradation of natural habitats in various parts of the world. Now, I would like to offer you a Special Issue focused on beetles, especially their systematics and evolution. Therefore, we would greatly appreciate high-level articles dealing with beetle taxonomy, biogeography, phylogenomics, morphology, paleontology and other aspects related to beetle diversity.

Dr. Jiří Kolibáč

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
