Deadline for manuscript submissions:

closed (31 May 2021)

# **Message from the Guest Editor**

In this Special Issue, we seek to bring together papers that will advance our overall knowledge of bird parasites, and provide a further foundation for our ability to conduct studies that can, for example:1) test ecological theory, 2) provide improved understanding of biogeographic patterns and the drivers of those patterns, 3) allow predictive modelling of parasite distributions based on climate change predictions, 4) improve our knowledge of parasite effects on host fitness, and 5) allow broader assessments of host specialization versus host generalism by parasites, and the factors underlying these strategies.

- Avian parasites
- Taxonomic diversity and host associations
- Host-parasite interactions
- Ecological assessment and modelling
- Biogeographical distribution
- Climate change effects

CITESCORE 3.4

# **Message from the Editor-in-Chief**

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
