Republic

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editor

Bryophytes are the second largest group of terrestrial plants after angiosperms, and not only for that reason, they deserve our attention. In a changing world, it is important to understand the mechanisms of change that occur, and this topic is now even more important to understand due to ongoing climate change. This Special Issue is focused on those changes from a broader perspective because it is not only about changes in the occurrence of bryophytes, but also their bioindication ability, changes in connection with climate change, understanding the causes and effects of such changes, predicting the future trends and others topics related to the changing world and bryophytes.

The team at *Diversity* and ourselves kindly invite you to submit a manuscript focused on any of the above topics. Although specific case studies with broad implications are welcome, we encourage authors to submit large-scale and/or multi-specific studies, synthesis works, and reviews that could better enlarge our knowledge of the distribution of Bryophytes in a Changing World. If you are interested in this opportunity or have any questions, please do not hesitate to contact us.

Molecular Biotechnology,
Heidelberg University, Im
Neuenheimer Feld 329, D-69120
Heidelberg, Germany

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
