Invasive Species as Game-Changers of Aquatic Ecosystems

Guest Editors:

Dr. Alexander F. Cerwenka

SNSB-Zoologische Staatssammlung München, Münchhausenstraße 21, 81247 München, Germany

Dr. Jörg Brandner

Wasserwirtschaftsamt Regensburg, Landshuter Str. 59, 93053 Regensburg, Germany

Dr. Dimitriy Antonov Dashinov

Department of General and Applied Hydrobiology, Faculty of Biology, Sofia University "St. Kliment Ohridski", 1504 Sofia, Bulgaria

Deadline for manuscript submissions:

closed (20 November 2022)

Message from the Guest Editors

Invasive alien species (IAS) are an increasing issue in our anthropogenically altered and coalescing world, especially in freshwater ecosystems. On the other hand, they offer the possibility of studying evolution and speciation in a seminatural contemporary "experiment". In addition, IAS compromise the chance to deeply analyze the effect of man-made forces on real-time evolution in an ad hoc manner. Particularly rapid local adaptation and differentiation are characteristics that may trigger successful invasions.

IAS have become a branch of biological research; however, many aspects are still to be investigated: This Special Issue is intended to give insights into previous findings but also to reveal gaps in our current knowledge, to serve as a warning regarding non-native species' spread, and to reveal hidden possibilities of this underexplored research branch, especially in aquatic ecosystems.

Editor-in-Chief

Prof. Dr. Michael Wink

Institute of Pharmacy and Molecular Biotechnology, Heidelberg University, Im Neuenheimer Feld 329, D-69120 Heidelberg, Germany

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
