Conflict and Coexistence between Humans and Wildlife

Guest Editor:

Prof. Dr. Li Zhang

College of Life Sciences, Beijing
Normal University, Beijing, China

Deadline for manuscript
submissions:

15 November 2024

Message from the Guest Editor

Wildlife population recovery and growth, population migration and dispersion, and the resulting human–wildlife conflicts have become globally recognized issues and formidable challenges. Over the past 30 years, there has been significant development in both theoretical research and mitigation strategies regarding human–wildlife conflicts and coexistence mechanisms; however, amidst the continuously changing global social and natural landscapes, wildlife migration routes, patterns, and mechanisms remain insufficiently understood. Moreover, the exacerbation of conflicts between humans and wildlife, triggered by wildlife population growth and migration, has attracted considerable social and public attention. Therefore, there is an urgent need to strengthen research on the mechanisms and patterns of wildlife population growth and migration dispersion, establish a warning system for human–wildlife conflicts, and develop conflict mitigation techniques to achieve harmonious coexistence between humans and wildlife.

Molecular Biotechnology,
Heidelberg University, Im
Neuenheimer Feld 329, D-69120
Heidelberg, Germany

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
