### Message from the Guest Editors

The main aim of this Special Issue of *Diversity* is to gather contributions from researchers working in different countries and different fields of malacology (or adjacent disciplines), with strong emphasis on themes related to the above-mentioned problems. We welcome publications on biodiversity, ecology, biogeography and conservation of continental Gastropoda and Bivalvia, as well as case studies on their taxonomy, phylogeny, physiology and paleontology, provided that these research studies are placed in a global change context. Both direct human impacts on continental Mollusca and other indirect natural factors can be discussed within this Special Issue. In other words, almost every aspect of current malacology can find its place under the ‘umbrella’ of this Special Issue’s main theme.

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
