Deadline for manuscript  
submissions:

**closed (15 November 2023)**

### Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a forthcoming Special Issue of *Diversity* focused on grassland ecosystems, which cover nearly 20% of the global terrestrial area and play an important role in species conservation, global carbon and water cycles as well as food supply.

In recent decades, grassland area experienced rapid climatic changes and sustained increases in human activities. As most of the grassland area covers vulnerable ecosystems, even minor disturbances can dramatically alter the structure and function of, or even completely destroy, the ecosystem, causing great diversity losses. How grassland diversity responds and adapts itself to these natural and artificial disturbances has recently drawn significant interest and become a global concern.

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
