Monitoring of Honey Bee Colony Losses

Guest Editor:

Prof. Dr. Aleš Gregorc

Faculty of Agriculture and Life Sciences, University of Maribor, Pivola 10, 2311 Hoče, Slovenia

Deadline for manuscript submissions:

closed (31 January 2020)

Message from the Guest Editor

Managed honey bees are subject to numerous internal and external pressures, including exposure to various pathogens, lack of diversity of food sources, and management problems. The presenting biology of colony health and effected mechanisms caused by stress factors and their interactions are important objectives to be presented in the Special Issue. Furthermore, the special issue will be targeted at honey bees as individual or social organisms responding to a variety of pathogens causing American and European foulbroods, varroosis, mycosis, and other diseases. Factors such as environment stressors, honey bee colony management, and beekeeping practices also factor in colonies' survival and the subject of a variety of studies and are welcomed for publication. Attention will be also given to the effects of pesticides on bees and their survival.

In addition, we encourage researchers to present new studies of nature, mechanisms, and relative importance of the potential factors in the recent losses in the beekeeping sector.

If you have any questins, please feel free to contact Gladys Di (gladys.di@mdpi.com).

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
