Ecology, Diversity, and Conservation of Primates

Guest Editors:

Dr. Renato Richard Hilário

Department of Environment and Development, Federal University of Amapá, Macapá 68903-419, Brazil

Dr. João Pedro Souza-Alves

Department of Zoology, Federal University of Pernambuco, Recife 50670-901, Brazil

Deadline for manuscript submissions:

closed (28 February 2023)

Message from the Guest Editors

Dear Colleagues,

Primates are an important component of the neotropical forests. Several primate species face threats throughout the Neotropical region, such as hunting, habitat loss and fragmentation, habitat degradation and introduction of exotic species, among others. Such negative factors may lead to a reduction in habitat area and change the availability and distribution of food, thus affecting primate ecology and behavior. However, there are also many efforts to promote primate conservation in this region, such as National Action Plans and the creation of protected areas. The Neotropical region hosts the highest primate diversity in the world, and although several studies have already been carried out with Neotropical primates, most studies are concentrated on a limited number of species and sites. There are still abundant knowledge gaps regarding neotropical primate.

This SI aims to contribute to the knowledge on neotropical primates, welcoming papers that advance in the knowledge of primate conservation, phylogenetics and primate ecology, including studies relating primate behavior to environmental factors, feeding ecology, landscape ecology, and other ecological studies.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
