Deadline for manuscript submissions:

closed (31 January 2023)

Message from the Guest Editors

Seagrasses play a significant global role in supporting biodiversity, mitigating climate change and supporting food security. However, they remain relatively unknown and are often sidelined in marine conservation plans. Currently, a significant challenge for seagrass ecosystems is that they are threatened globally. Moreover, seagrass research continues to fall behind that of other coastal ecosystems, undermining its public recognition and presence in conservation policy. Research areas in which seagrasses are already receiving considerable attention in particular could be used to gain a broader interest in seagrass conservation. Even so, there are still many knowledge gaps about seagrass that need to be filled, including basic ecological and distributional awareness.

For this SI, we invite submissions that contribute knowledge supporting conservation actions on seagrass using a variety of topics. We hope to collate a diverse body of recent progress in the field of seagrass ecology restoration and management. These will provide opportunities for seagrass research to work other aspects of seagrass conservation and would improve local, regional and global seagrass recognition.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
