## Adaptive Evolution and Management in Small Mammals

Guest Editors:

### **Dr. Jiapeng Qu**

Key Laboratory of Adaptation and Evolution of Plateau Biota, Northwest Institute of Plateau Biology, Chinese Academy of Sciences, Xining 810008, China

### **Dr. Wei Liu**

State Key Laboratory of Integrated Pest Management, Institute of Zoology, Chinese Academy of Sciences, Beijing 100101, China

Deadline for manuscript submissions:

**closed (15 December 2022)**

### **Message from the Guest Editors**

Dear Colleagues,

We are pleased to announce a forthcoming Special Issue of *Diversity* focused on small mammals, which are distributed in the wild throughout almost the entire terrestrial ecosystem, even in the oceans.

Small mammals are the animals with the highest morphological structure and the most perfect physiological function in the animal kingdom. Compared with other animals, mammals' most prominent feature is viviparous birth and the feeding of their young with milk from the mother. Mammals adapt to a variety of complex living environments and have highly developed brains. There are around 2000 extant species of small mammals in the world. Although small mammals have been studied in terms of life history, population dynamics, behaviour and genetics, detailed studies on their adaption, evolution and management are still lacking.

## Editor-in-Chief

### **Prof. Dr. Michael Wink**

Institute of Pharmacy and  
Molecular Biotechnology,  
Heidelberg University, Im  
Neuenheimer Feld 329, D-69120  
Heidelberg, Germany

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Biodiversity Conservation) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
