## Wildlife in Natural and Altered Environments

Guest Editor:

**Dr. Francisco Javier Zamora-Camacho**

Departamento de Biodiversidad, Ecología y Evolución, Facultad de Ciencias Biológicas, Universidad Complutense de Madrid, C/José Antonio Novais 12, 28040 Madrid, Spain

Deadline for manuscript submissions:

**28 February 2025**

### Message from the Guest Editor

Dear Colleagues,

The Anthropocene is pushing wildlife to confront unprecedented scenarios of environmental human-induced alterations. These modifications of natural habitats come in a plethora of forms, spanning from physical (such as noise or light pollution, as well as the increase in average temperature due to the climate change) or chemical phenomena (such as contamination that stems from agriculture, mining or waste treatment) to profound transformations of the landscape (such as deforestation or urbanization), to mention but a few. In this situation, understanding the consequences that those alterations may have on organisms facing them, and the mechanisms involved, is crucial for an appropriate management of this global crisis. This Special Issue intends to bring together advancements on the knowledge of the processes that wildlife is undergoing in natural and altered environments, with the core aims of optimizing their management and understanding the ongoing degradation but also the evolutionary processes underlying.

## Editor-in-Chief

### **Prof. Dr. Michael Wink**

Institute of Pharmacy and  
Molecular Biotechnology,  
Heidelberg University, Im  
Neuenheimer Feld 329, D-69120  
Heidelberg, Germany

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
