an Open Access Journal by MDPI

## Perception, Decision-Making and Control of Intelligent Unmanned System

Guest Editors:

**Prof. Dr. Shuang Li**

**Dr. Chengchao Bai**

**Dr. Jinzhen Mu**

Deadline for manuscript  
submissions:

**closed (20 April 2025)**

### Message from the Guest Editors

This Special Issue focuses on the design of intelligent drone systems, including research into control systems, artificial intelligence, decision-making, UAV modelling and simulation, etc. The aim of this Special Issue is to provide a venue for drones research on artificial intelligence, unmanned systems, robotics, automation, intelligent systems, etc. All papers will be published in an open access format following peer review. Both research papers and overview papers are welcome. Topics of interest include (but are not limited to) the following:

- Intelligence unmanned systems;
- Artificial intelligence;
- Robotics and automation;
- Machine learning;
- Safe learning;
- Formation control;
- Group formation tracking;
- Bipartite cooperative;
- SLAM (simultaneous localization and mapping);
- Collaborative perception and positioning;
- Decision making;
- Drones;
- Path planning;
- Image fusion;
- Feature fusion;
- Sensor fusion;
- Scene understanding.

# Special Issue

## Editor-in-Chief

### **Prof. Dr. Diego González-Aguilera**

Cartographic and Land  
Engineering Department, Higher  
Polytechnic School of Avila,  
University of Salamanca, Hornos  
Caleros, 50 05003 Avila, Spain

## Message from the Editor-in-Chief

*Drones* is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [Ei Compendex](#) and [other databases](#).

**Journal Rank:** JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
