Unconventional Drone-Based Surveying 2nd Edition

Guest Editors:

Dr. Arianna Pesci

Istituto Nazionale di Geofisica e Vulcanologia, Sezione di Bologna, Viale Berti Pichat, 6/2 Creti 12, I-40127 Bologna, Italy

Dr. Giordano Teza

Department of Physics and Astronomy, Alma Mater Studiorum, University of Bologna, Viale Berti Pichat, 6/2 Creti 12, I-40127 Bologna, Italy

Dr. Massimo Fabris

Department of Civil, Environmental and Architectural Engineering-ICEA, University of Padova, 35122 Padova, Italy

Deadline for manuscript submissions:

31 December 2024

Message from the Guest Editors

This Special Issue aims to collect papers addressing all kinds of problems encountered in unconventional dronebased surveying. Given that any type of sensor can be considered, with no limits other than the condition that the operations must be performed safely (including, but not limited to. cameras for Structure-from-Motion (SfM): photogrammetry thermal infrared multispectral or hyperspectral sensors; compact LiDAR; microphones; and sonars). The term "drone" refers to any unmanned object that can be used for surveying, thus encompassing Unmanned Aerial Vehicles Unmanned Surface Vehicles (USVs) (whether a boat or even a terrestrial vehicle). Unmanned Underwater Vehicles (UUVs), and even an element of a system in which two or more of these types of drones, or even of drones different types (e.g., UAVs and USVs), jointly operate.

Editor-in-Chief

Prof. Dr. Diego González-Aguilera

Cartographic and Land Engineering Department, Higher Polytechnic School of Avila, University of Salamanca, Hornos Caleros, 50 05003 Avila, Spain

Message from the Editor-in-Chief

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. Drones publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. Drones seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q1 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
