The importance of digital learning refers to the application of technology with its adaptation and adoption to support the instructional process. Its potential value aims at providing both effective and efficient gateway through the usage and application of digital online and technology in helping learners to achieve the target plan. The skills acquisition, together with knowledge comprehension, are, as a result, becoming an initial pathway on adapting the information transmission process to be delivered in the communication technology procedure. The essence of such facilities has clearly provided an effective tool and platform to assist the learning outcomes process. Providing the digital resources is involved with designing the current trends of information and communication pathway in supporting the learner interaction. The design facilitated by the digital learning technology provided the substantial facilities with the procedural pathway, space, and time engagement.
