### Message from the Guest Editor

The purpose of this issue is to examine through critical perspectives the current research that highlights how high-quality early education can contribute to developing the strengths and talents of children from diverse backgrounds that will ultimately lead to reducing achievement and equity gaps that are present in current K-12 education. This issue is situated within the growing body of early childhood literature that examines social and cultural concepts of “kindergarten readiness” and policy issues that impact current accountability systems for funded programs. The editor of this Special Issue will particularly seek articles related to the relationship between policies and systems that influence choices for curriculum and instruction and how those choices influence outcomes for young children.
