Effects of Collective Trauma in the Modern Society

Message from the Guest Editors

In an era of uncertainty, it is expected to experience changes in everyday functioning. Crises, such as war, natural disasters, or other catastrophes that are out of our control and influence, can easily form collective traumatic experiences. Collective trauma refers to the effect of a traumatic experience that impacts and involves entire communities, societies, or groups of people. Since collective traumas can be passed down to future generations and form transgenerational trauma, it is important to detect these experiences and implement appropriate tools necessary for rehabilitation, post-traumatic growth, and resilience. This Special Issue calls for the submission of manuscripts related to the effects of various collective traumas on everyday functioning in the modern world and appropriate coping skills needed to reduce the impact of symptoms in the aftermath of a traumatic experience.

About the Journal

Message from the Editorial Board

The journal offers an integrating approach to the disciplines it addresses, highlighting the role of health as a transversal axis in educational and psychological processes, present in human development, throughout the life cycle. *European Journal of Investigation in Health, Psychology and Education* (ISSN 2254-9625) is a peer-reviewed scientific journal that publishes original articles and systematic reviews or meta-analyses related to research on human development throughout the life cycle. It is a journal of the University Association of Education and Psychology and is published monthly online by MDPI.

Editors-in-Chief

Dr. José Jesús Gázquez Linares

1. Department of Psychology, Universidad de Almería, Calle Universidad de Almería, 04120 Almería, Spain

2. Universidad Autónoma de Chile, Av. Pedro de Valdivia 425, Providencia, Región Metropolitana, Chile

Dr. María del Carmen Pérez-Fuentes

Department of Psychology, Universidad de Almería, Almería, Andalucía, Spain

Author Benefits
