Dr. Paula Varandas Ferreira

ALGORITMI Research Center, University of Minho, Campus de Azurém, Guimarães, 4710-057 Braga, Portugal

Deadline for manuscript submissions:

closed (31 August 2022)

Message from the Guest Editors

Horizon 2020 is the biggest EU Research and Innovation program ever, with nearly EUR 80 billion of funding available over 7 years until 2020. Electrical engineering is one of the key fields of research and innovation for industrial leadership and energy transition in the work program proposed and, therefore, the results and insights of these projects will contribute significantly to society.

This Special Issue aims to give researchers in Horizon 2020 projects related with electrical engineering the opportunity to publish under open access conditions. The contributions cover the one or a combination of the following points:

- Literature reviews on relevant subjects of the projects, including problem formulation;
- Methodologies and proposal of solutions for problems. Demonstration of the solutions by simulation:
- Insights and results of demonstration activities in different environments (experimental and piloting);
- Economic and business models in relation with the solutions proposed. Regulation studies and recommendations
