

Special Issue

Recent Advances in Electricity Economics

Message from the Guest Editors

This Special Issue is being launched with the aim of reviewing the economic effects of the adoption of different initiatives (dismantling coal, nuclear, or conventional generation plants; electric-car deployment; the development of power electronics; self-consumption; renewable energy integration; CO2 prices (ECTS); changes in consumer habits; big-data applications, etc.) in various aspects, both in the electricity markets (day ahead and ancillary services) and in the rest of the energy markets (gas and coal), and the environmental impacts on emission levels and ECTS prices, as well as, from a macroeconomic point of view regarding economic growth, the overall efficiency of the system and unemployment rates. Topics welcome to this Special Issue include but are not restricted to the following:

- Economic analysis
- Electricity markets
- Environment
- Renewables
- Grid integration
- Electric vehicles
- Demand electrification

Guest Editors

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Andreas Sumper
CITCEA-UPC, Department of Electrical Engineering, Universitat
Politecnica de Catalunya, 08028 Barcelona, Spain

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27.2 days after submission; acceptance to publication is undertaken in 5.9 days (median values for papers published in this journal in the first half of 2024).

Journal Rank:

CiteScore - Q2 (Electrical and Electronic Engineering)
