

Special Issue

Conductive and Functional Polymers: New Advances and Perspectives in Sensor Technology

Message from the Guest Editors

An increasing amount of interest in the development and operation of analytical devices for the detection, quantification, and monitoring of specific analytes has led to the appearance of sensors and biosensors. These devices are successfully gaining a growing number of recipients in the field of medical diagnostics, environmental protection, and food safety thanks to their high sensitivity, specificity, and ability to analyze in real-time. This Special Issue aims to highlight the fundamental research and latest advancement in the synthesis, fabrication, characterization, properties, and foresights of functional and conductive polymers for their application in the fabrication of sensors and their integration in soft robotics. Keywords

- synthesis of functional and conductive polymers
- polymers for electrode modification in biosensors
- polymers for flexible optical sensors
- polymers for chemical sensors and biosensors
- polymers for 3D printing of sensor devices
- semiconducting polymers for sensor applications

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Masato Sone
Institute of Innovative Research, Tokyo Institute of Technology, 4259
Nagatsuta-cho, Midori-ku, Yokohama 226-8503, Japan

Author Benefits

High Visibility:

indexed within Scopus, CAPlus / SciFinder, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 20.5 days after
submission; acceptance to publication is undertaken in 7.3
days (median values for papers published in this journal in
the second half of 2024).

Journal Rank:

CiteScore - Q2 (Materials Chemistry)
