

Image and Video Processing and Retrieval Based on Machine Learning and Deep Learning

Guest Editors:

Dr. Raju Shrestha

Department of Computer
Science, Oslo Metropolitan
University, N-0130 Oslo, Norway

Prof. Dr. Sule Yildirim Yayilgan

Department of Information
Security and Communication
Technology, Norwegian
University of Science and
Technology, 2815 Gjøvik, Norway

Deadline for manuscript
submissions:

closed (15 August 2024)

Message from the Guest Editors

Image and video processing and retrieval using machine learning and deep learning constitutes a rapidly growing field of research with numerous applications in areas such as multimedia search, video surveillance, medical imaging, content-based retrieval, and computer vision.

Image and video retrieval involves the automatic searching and categorization of large collections of visual media. Deep learning methods, including convolutional neural networks (CNNs), autoencoders, transformers, and generative adversarial networks (GANs) have proven to be effective in image and video processing and retrieval tasks. These techniques can recognize, classify, and generate visual content with high levels of accuracy, leading to the development of powerful algorithms. As research continues in this area, the development of new algorithms and techniques is expected to result in more accurate, efficient, and reliable processing and retrieval systems for visual media, revolutionizing the way we interact with and analyze visual content.

This Special Issue aims to present recent research work on image processing, video processing, as well on retrieval applications.

an Open Access Journal by MDPI

Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
