

Machine and Deep Learning: Beyond Computational and Data-Related Limitations

Guest Editors:

Dr. Matei Mancias

Numediart Institute of Creative Technologies, University of Mons (UMONS), 7000 Mons, Belgium

Prof. Dr. Sidi Ahmed Mahmoudi

Faculty of Engineering, University of Mons, 7000 Mons, Belgium

Deadline for manuscript submissions:

closed (30 June 2024)

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to investigate innovative solutions to overcome two major obstacles in current AI technology: the lack of properly labeled data and the lack of storage and computational capacity on lightweight and embedded systems. We encourage authors to submit papers within different domains with or without industrial applications. This Special Issue aims to cover recent advances in DNN architecture compression and edge deployment on the one hand, and advances in unsupervised learning, self-/semi-supervised learning, multimodal learning, explainable deep learning, active learning and continuous learning on the other hand. Reviews and surveys on the state-of-the-art DNN architectures are also welcomed. The topics of interest for this Special Issue include:

- DNN software compression;
- DNN hardware compression;
- DNN pruning and quantization;
- Knowledge distillation;
- Model deployment in edge and cloud architectures;
- Edge artificial intelligence;
- Unsupervised learning;
- Semi-supervised and self-supervised learning;
- Active learning;
- Explainable deep learning;
- Continual learning;
- Knowledge transfer;
- Lifelong learning.

an Open Access Journal by MDPI

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
