

## Disruptive Antenna Technologies Making 5G a Reality, 2nd Edition

Guest Editors:

**Dr. Syed Muzahir Abbas**

Electrical and Electronic  
Engineering, Macquarie  
University, Macquarie Park, NSW  
2109, Australia

**Dr. Muhammad Ali Babar  
Abbasi**

School of Electronics, Electrical  
Engineering and Computer  
Science, Queen's University  
Belfast, Belfast BT9 5BN, UK

Deadline for manuscript  
submissions:

**15 November 2024**

### Message from the Guest Editors

With this Special Issue, we wish to give a platform to success stories surrounding 5G-enabling antenna technologies and what future prospects they carry with them. 5G antennas are known to be a new type of antenna that are highly integrated, support flexible all-band configuration, and enable scenario-specific beam management. Unlike 3G and 4G antennas that provide coverage with fixed beam patterns and directivity, 5G antennas must support on-demand beamforming according to application scenarios and user distributions. 5G antennas must be able to support beam management to help deliver precise coverage in target areas while significantly suppressing interference in other areas. Finally, antennas must evolve from plug-and-play components in 3G and 4G networks to key network elements that support flexible beam configuration and management in 5G networks.

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
