Engineering and Physical  
Sciences, University of Leeds,  
Leeds LS2 9JT, UK

Deadline for manuscript  
submissions:

**closed (15 October 2024)**

### Message from the Guest Editors

Recent years have witnessed the booming of machine intelligent systems, from online information systems to on-device hardware systems. Advanced machine intelligent systems are able to automatically collect data, analyze their patterns, and yield correct predictions and operations. In particular, the development of AI techniques have accelerated the research into machine intelligent systems, from large-scale deep neural networks to lightweight on-device models.

While significant progress has been made in the field of machine intelligence, there are still numerous limitations and challenges to achieving the full potential of these systems. One of the main challenges is the overwhelming amount of information that needs to be processed and analyzed for intelligent decision making. This is particularly intricate for large-scale information systems, where large amounts of data can be exploited for accurate prediction and recommendation. There is also a huge requirement for efficient systems that can operate in real-time and dynamic environments and handle complex tasks at scale. It is, therefore, imperative to devise efficient and resilient algorithms and architectures.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
