Advances in Algorithm Optimization and Computational Intelligence

Guest Editors:

Dr. Amin Amini
School of Engineering and Computing, University of Central Lancashire (UCLan), Preston PR1 2HE, UK

Dr. Bacha Rehman
Department of Computer Science, Solent University, Southampton SO14 0YN, UK

Prof. Dr. Chih-Lung Lin
Graduate Institute of Intelligent Robotics, Hwa Hsia University of Technology, New Taipei City 235, Taiwan

Deadline for manuscript submissions:
15 April 2025

Message from the Guest Editors

Dear Colleagues,

This Special Issue's objective is to spotlight avant-garde research and methodologies that augment the efficacy, robustness, and versatility of algorithms. The focus of this Issue is the exploration and development of novel algorithmic strategies, the application of machine learning techniques for optimization, and the advancement of artificial intelligence paradigms for complex problem-solving.

We aim to provide a conduit for academics and industry professionals in terms of disseminating their research outcomes and methodologies in the realms of algorithmic optimization and computational intelligence. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

1. Machine learning algorithms
2. Evolutionary computation
3. Swarm intelligence
4. Artificial neural networks
5. Fuzzy systems
6. Decision support systems
7. Optimization algorithms
8. Deep learning
9. Natural language processing
10. Computer vision

Special Issue

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.
Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
