Message from the Guest Editors

Dear Colleagues,

Automated Methods for Speech Processing and Recognition focuses on the latest advancements in the field of speech technology. The goal of this collection of articles is to showcase cutting-edge research and innovations aimed at automating various aspects of speech analysis, synthesis, and recognition. Researchers and experts in the field explore topics such as automatic speech recognition (ASR), natural language processing (NLP), speaker recognition, and speech synthesis using machine learning and deep learning techniques. The special issue serves as a comprehensive resource for professionals and enthusiasts interested in the development of automated systems that can understand and generate human speech, with applications ranging from virtual assistants to transcription services and more.

Deadline for manuscript submissions:

closed (15 June 2024)

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
