## Theories and Technologies in Software Engineering

Guest Editors:

**Dr. Enrique Moguel**

Department of Computer and Telematic System Engineering, University of Extremadura, Av. De la Universidad s/n., 10003 Cáceres, Spain

**Dr. Daniel Flores-Martin**

Quercus Software Engineering Group, University of Extremadura, Av. De la Universidad s/n., 10003 Cáceres, Spain

Deadline for manuscript submissions:

**15 October 2024**

### Message from the Guest Editors

Dear Colleagues,

In modern society, software is used in many ways. Typical software types include email clients, embedded systems, HMI, office suites, operating systems, compilers, databases, and games. At the same time, computer software is used in almost every industry, such as manufacturing, agriculture, banking, aviation, and government agencies. Furthermore, software plays an extremely important role in scientific research: software is used for instrument control, data analysis, and publication of scientific results. These applications promote economic and social development and improve the efficiency of work and life.

This Special Issue aims collate original research in the field of software-intensive systems, fundamental connections between software engineering and information theory and, especially, the state-of-the-art technologies and tools in the field of software engineering. These include, but are not limited to, the following:

- Software engineering methods
- Responsible software engineering
- Software deployment and operations
- Software for the cloud
- Software engineering for quantum computing
- Emerging technologies for software engineering
- Trends in software engineering

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
