

Compiler and Hardware Design Systems for High-Performance Computing

Guest Editors:

Dr. Jinsung Kim

School of Computer Science and Engineering, Chung-Ang University, Seoul 06974, Republic of Korea

Dr. Jaehwan Lee

Department of Computer Science and Engineering, Kongju National University, Cheonan 31080, Republic of Korea

Deadline for manuscript submissions:

15 January 2025

Message from the Guest Editors

Compilers and computer architecture are both critical components of modern computing systems because their significance lies in their essential roles in making software and hardware work together efficiently and effectively. Compilers enable developers to write code in higher-level languages and convert it into machine code, making programming more accessible and efficient. Therefore, compilers and computer architecture both play a critical role in enhancing modern computing technology given that high-performance parallel architectures are exploited to solve many critical challenges in a variety of areas.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- High-performance computer architectures;
- IoT, mobile, Edge, and embedded architectures;
- Compilers, runtimes, and programming languages for parallel computer systems;
- Compilers and programming languages for novel architectures;
- Heterogeneous computing accelerators;
- Machine learning compilers and runtime;
- Programming languages for machine learning;
- Specialized hardware for machine learning.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
