

AIoT and Mobile Networking

Guest Editors:

Prof. Dr. Young-Joo Suh

Department of Computer Science and Engineering, Pohang University of Science and Technology (POSTECH), San 31, Hyoja-Dong, Pohang 790-784, Republic of Korea

Prof. Dr. Young Deok Park

Department of Computer Engineering, Yeungnam University, Gyeongsan, Gyeongbuk 42415, Korea

Deadline for manuscript submissions:

closed (15 September 2024)

Message from the Guest Editors

Dear Colleagues,

AIoT is the convergence of Artificial Intelligence (AI) and Internet of Things (IoT) technologies. AIoT is a technology that collects useful data by utilizing IoT infrastructure and draws insight from those data. Empowered by AI, IoT enables a variety of services across a myriad of fields from smart healthcare and personalized recommendation systems to intelligent management and large-scale surveillance systems for cities and industries including manufacturing and agriculture.

Beyond the digital transformation of services, AIoT aims to make everything intelligent and autonomous.

Despite a great amount of effort made regarding applying AI to IoT, AIoT faces technical challenges. Network systems must support ultra-high bandwidth, low latency, reliable connections, and flexible resource allocation to keep pace with the explosive growth of IoT traffic. Designing scalable multitenant AIoT platforms and frameworks is challenging due to AI-driven workloads and device diversity. Ensuring data privacy and eliminating security vulnerabilities in edge clouds and end devices with low computing power are also important challenges.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
