Message from the Guest Editors

This Special Issue aims to provide a comprehensive and multidisciplinary overview of the current state-of-the-art and future perspectives of ferroelectric materials and applications. It will feature articles that address the structural, electrical and optical properties of these materials, as well as their potential applications in ferroelectric devices. It will also highlight the emerging trends and challenges in the field, such as novel ferroelectric materials, nanostructures, heterostructures, interfaces and domain engineering, as well as the integration of ferroelectric materials with other functional materials. This overview of the field will showcase the diverse and interdisciplinary applications of ferroelectric materials.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
