Deadline for manuscript  
submissions:  
**closed (31 January 2023)**

### Message from the Guest Editors

Dear Colleagues,

Dynamic chaos is a widespread nonlinear phenomenon that has long been recognized as an important area of scientific research. Over the past decade, a significant amount of work has been carried out to introduce technologies using dynamic chaos in various high-tech areas: electronics, optoelectronics and lasers, information technology and telecommunications, control theory, cryptography, robotics, etc.

The purpose of this issue is to highlight the current progress in the development and investigation of electronic circuits and systems with chaotic dynamics in electronic and information engineering and discuss the current trends and challenges in the use of such systems in various application areas. Finally, this Special Issue welcomes both original papers and review articles concerning different aspects of nonlinear dynamics, the design and investigation of nonlinear electronic circuits and systems and their applications in the wide-ranging area of modern information technologies and engineering.

an Open Access Journal by MDPI

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
