Bio-Information and Human Body Communication for Ubiquitous Healthcare

Guest Editors:

Prof. Dr. Youn Tae Kim

Department of Electronic Engineering, Chosun University, Gwangju 61452, Republic of Korea

Dr. Junghwan Hwang

Electronics and Telecommunications Research Institute, Daejeon, Korea

Prof. Dr. Meina Li

Department of Instrument Science and Technology, Jilin University, 938 West Democracy Avenue, Changchun City, Jilin Province, China

Deadline for manuscript submissions:

closed (30 September 2022)

Message from the Guest Editors

Ubiquitous healthcare is an important field that provides value-based care to millions of people while generating high revenues in many countries. This technology can provide a scalable solution to prevent severe disease by predicting early disease remotely, beyond the scope of diagnosis. In addition, human body communication is a field in which a cable that connects terminals is not required by utilizing the human body as a medium for signals, and high-speed data transmission is possible with low power. When this technology is combined with the healthcare field, a network that integrates and manages various sensors can be formed to manage extensive information with a low-power module, thereby providing better quality services. This Special Issue welcomes contributions from all of our industry peers to cover the latest developments in ubiquitous healthcare, wearable sensors, bio-signal data transmission through human body communication, and a variety of similar topics.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems

Engineering)
