Engineering, Modeling,
Electronics and Systems,
University of Calabria, 87036
Arcavacata, Italy

Deadline for manuscript
submissions:

15 October 2024

Message from the Guest Editor

Computational electromagnetics (CEM) methods are widely used in the analysis of scattering and radiation characteristics of a complex electromagnetic (EM) environment, which are widely used in microwave remote sensing, radar detection, stealth design, and so on.

This **Special Issue** aims to showcase new ideas, algorithms, and applications related to the concept of computational electromagnetics and beyond. Possible topics are as follows:

- Full-wave and high-frequency computational electromagnetics methods;
- Complicated scattering mechanisms and analysis from antennas and circuit structures;
- The application of electromagnetic simulation methods.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Editor-in-Chief

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
