## Enhancing Efficiency and Driving Innovation in the Semiconductor Industry through Artificial Intelligence Applications

Guest Editors:

**Prof. Dr. Wei-Chang Yeh**

Department of Industrial Engineering and Engineering Management, National Tsing Hua University, Hsinchu, Taiwan

**Prof. Dr. Siddhartha Bhattacharyya**

Department of Computer Science, VSB Technical University of Ostrava, 700 80 Ostrava, Czech Republic

**Dr. Wenbo Zhu**

School of Mechanical and Electrical Engineering and Automation, Foshan University, Foshan 528225, China

Deadline for manuscript submissions:

**15 November 2024**

### Message from the Guest Editors

This Special Issue, entitled "Intelligent Semiconductors", delves into the transformative impact of Artificial Intelligence on the semiconductor industry, a critical driver of technological advancement across various sectors such as computing, telecommunications, healthcare, and the automotive industry. As these industries face increasing demands for efficiency, precision, and miniaturization, AI has emerged as an essential tool for enhancing the design, manufacturing, testing, and deployment of semiconductors. This issue aims to showcase cutting-edge research, case studies, and practical applications that demonstrate the integration of AI in optimizing semiconductor processes, from design and simulation to defect detection and quality control. It also explores AI-driven solutions for supply chain optimization, energy efficiency, and emerging technologies like quantum computing and flexible electronics. By fostering a dialogue among researchers, practitioners, and industry professionals, this SI seeks to provide a comprehensive overview of current advancements, address challenges, and outline future research directions at the intersection of AI and semiconductor technology.

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
