Message from the Guest Editors

The topics of this Special Issue include, but are not limited to, the following:

- knowledge acquisition and engineering;
- data mining methods;
- big knowledge analytics;
- data mining, knowledge discovery, and machine learning;
- knowledge modeling and processing;
- knowledge acquisition and engineering;
- query and natural language processing;
- data and information modeling and data and information semantics;
- data-intensive applications;
- knowledge representation and reasoning;
- decision support systems;
- decision-making;
- rules mining and outliers mining;
- data exploration;
- data science;
- semantic web data and linked data;
- ontologies and controlled vocabularies;
- data acquisition;
- multidimensional data analysis;
- artificial intelligence and knowledge management;
- knowledge representation in artificial intelligence;
- supervised and unsupervised learning methods;
- parallel processing and modeling;
- languages based on parallel programming and data mining.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
