# Massive MIMO Technology for 5G and Beyond

Guest Editors:

Message from the Guest Editors

Prof. Dr. Jianhua Zhang

Dear Colleagues,

**Dr. Yuxiang Zhang** 

.

Prof. Dr. Jiayi Zhang

The main aim of this Special Issue is to seek new theories in massive MIMO, including channel characteristics, performance analysis, and optimization methods. The topics of interest include, but are not limited to:

Dr. Zhimeng Zhong

 Channel measurements and modeling in massive MIMO system:

Dr. Jianwu Dou

• Novel channel characteristics for massive MIMO system, i.e., non-stationary property, channel sparsity in time and spatial domain:

Dr. Tao Jiang

 Theoretical performance analysis for massive MIMO system;

Deadline for manuscript submissions:

 Application of massive MIMO system in novel scenarios, i.e., aerial vehicles, massive connectivity, ultra low-latency communications, and ultrareliable communications:

closed (30 April 2023)

- Advanced and low-complexity massive MIMO enabling transmission technique design, i.e., channel estimation, hybrid-beamforming, MU-MIMO, and cell-free deployments;
- Joint MIMO transceiver design;
- New paradigm of massive MIMO system, i.e., reconfigurable intelligent surface (RIS), holographic MIMO;
- New mathematical methods of signal processing for massive MIMO system;
- Artificial Intelligence applications of robust massive MIMO system design.

## **Editor-in-Chief**

### Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

## **Message from the Editor-in-Chief**

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems

Engineering)
