

## Applications of Neural Networks for Speech and Language Processing

Guest Editors:

**Dr. Daniel Hládek**

**Prof. Dr. Matúš Pleva**

**Prof. Dr. Piotr Szczuko**

**Dr. Andrej Zgank**

Deadline for manuscript  
submissions:  
**closed (15 November 2022)**

### Message from the Guest Editors

Dear Colleagues,

Speech and language processing are key elements for natural interaction with devices and services. Current deep-learning systems (e.g., end-to-end approaches) reveal and use intrinsic knowledge hidden in a record of human communication in acoustic, visual, or textual form. Advances in the research have blurred the line between algorithms and methods. Machine translation and speech recognition can apply a similar-looking neural network to transcribe the input data into comprehensible output. This convergence of methods brings new possibilities, but also new challenges. This Special Issue provides an opportunity to discuss the current applications, trends, and directions in the processing of human interaction using neural networks.

We welcome contributions reporting applications or enhancements of neural networks in the following areas (topics include, but are not limited to):

- Speech processing, recognition, and synthesis
- Natural language processing
- Multimodal processing

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
