Message from the Guest Editors

Model-driven engineering (MDE) began as a software development methodology but has since been extended to a wide range of applications, also in the science of electronics and its applications. MDE promotes the usage of high-level and domain-specific modeling languages together with automatic transformations to improve all the activities during the development lifecycle.

This Special Issue will be a forum to share practical applications of MDE and concrete experiences in information and control systems, both in critical and non-critical domains. In this context, we are envisaging works covering one or more of the following topics...

Deadline for manuscript submissions:

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
