Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editor

Dear Colleagues,

In recent years, power electronic converters have played an important role in industry products for different applications such as plug-in electric vehicles, electric vehicles, renewable energy systems, bidirectional power flow for battery chargers, high-efficiency power supplies, and industry applications. High-efficiency demands in power converters are becoming essential for commercial and industrial power units in various ways. This Special Issue focuses on the development of novel circuit topologies in power electronics.

The particular topics of interest include, but are not limited to:

- New trends and technologies for power converters;
- Multilevel converter topologies;
- Energy storage technologies;
- Renewable energy conversion;
- Integration of renewable energy technologies into the DC or AC grid;
- Review of power converter technologies;
- Electric vehicle applications;
- High-efficiency power converters for switching mode power supplies;
- Modulation techniques for power converters;
- Bidirectional power converters;
- Power converters for industry applications.

## Editor-in-Chief

**Prof. Dr. Flavio Canavero**

Department of Electronics and  
Telecommunications,  
Politecnico di Torino, 10129  
Torino, Italy

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
