submissions:

closed (15 June 2024)

Message from the Guest Editor

We are pleased to announce this Special Issue on "Emerging Trends of Internet of Things (IoT) Technologies for Healthcare Systems". With the advancement in IoT technologies, it is now possible to collect, monitor and analyze data from various healthcare devices and systems remotely.

The aim of this Special Issue (SI) is to showcase the latest IoT solutions for healthcare systems on a shared platform for academia and industry researchers. This will advance the state-of-the-art of this field by eliciting new applications and disruptive solutions for medical science and healthcare. For example, these applications can protect patients and help physicians by providing advice and recommendations.

Keywords

- IoT/eHealth
- remote patient monitoring
- telemedicine
- wearable devices
- digital health records
- cloud computing/fog and edge computing
- pervasive computing
- artificial intelligence/machine learning
- big data/data analytics
- ambient assisted living

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
