Dr. Juyeop Kim
Department of Electronics Engineering, Sookmyung Women`s University, Yongsan-gu, Seoul 04310, Korea

Message from the Guest Editors

In this Special Issue, we are particularly interested in describing, defining, and quantifying the potential problems and the mitigation techniques for software-defined wireless technologies which can be applied for future wireless systems and networks.

Keywords

- 5G/B5G/6G
- Software-defined radio and software-defined network
- Software modem
- Softwareization
- Communications systems and networks
- System development
- Wireless applications
- Machine learning-based communications and networking
- Security for future wireless communications
- Big Data for future wireless communications

Special Issue

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.
Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
