### Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to bring together academic research and industrial practices in areas such as architectural models, tools, technologies, and their applications to engineering IoT systems. The proposed Special Issue primarily focuses on:

- **Architectures:** System- and software-level architectures that support models, patterns, processes, and languages to architect and develop software-intensive IoT applications and systems.

- **Technologies:** Platforms, infrastructures, and implementation technologies that are driven by software engineering to develop, deploy, and operationalise IoT.

- **Applications:** Real-world systems and scenarios that apply software engineering principles and practices to engineer IoT that can address the challenges of smart systems, cities, societies, and infrastructures.
