submissions:

closed (30 June 2022)

Message from the Guest Editor

Research in unmanned aerial vehicles (UAVs) has grown significantly, and it has paved the way to numerous applications in both civilian (agriculture and forest monitoring, package delivery, building and structural inspections, search-and-rescue, law enforcement) and military domains (surveillance, combat, border protection), resulting in improved productivity, safety, and efficiency.

In this Special Issue, we focus on the benefits of UAVs for supporting advanced developments of the Internet of Things (IoT) with an emphasis on (but not limited to) their intelligent applications, such as for future smart cities. As such, we would like to invite researchers working in these research areas to share their findings while fostering collaboration among interdisciplinary experts, i.e., robotics and automation, machine learning and data science, communications, and signal processing as well as cybersecurity and forensics, to achieve a holistic approach to the research problems.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
