

Future Trends and Challenges of Ubiquitous Computing and Smart Systems

Guest Editor:

Dr. Namgi Kim

School of Computer Science and Engineering, Kyonggi University, Gyeonggi-do 16227, Republic of Korea

Deadline for manuscript submissions:

15 October 2024

Message from the Guest Editor

Dear Colleagues,

The era of ubiquitous computing and smart systems has already begun. With the growing trend of the IoT and sensor devices, many smart applications are already enriching our lives. However, there are still many issues that require their further widespread deployment.

Therefore, this Special Issue focuses on discussing the future trends and challenges of ubiquitous computers and smart systems. Potential topics include but are not limited to:

- Ubiquitous computing;
- Smart intelligent systems;
- Advanced networks;
- Big data systems;
- Computational intelligence;
- Smart pattern recognition;
- Sensors, IoT and IIoT;
- Smart image processing;
- Machine learning;
- Multimedia systems.

Dr. Namgi Kim

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
