

Advances in Vehicle Networks

Guest Editor:

Prof. Dr. Serguei Primak

Department of Electrical and
Computer Engineering, The
University of Western Ontario,
London, Canada

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editor

Connected vehicles are expected to transform the way we navigate modern cities, industrial cities, and agricultural lands, but they will not stop there. Vehicle-to-anything (V2X) communications, enabling electronics and software, networking and machine learning tools, and interaction between machines and humans are fundamental building blocks of this modern technology. Increased computational power and faster and more reliable communications enable extensive use of machine learning algorithms, optimization and information exchange, and widen the range of possible applications. Of particular interest are research areas which combine more than one classical field.

This Special Issue solicits novel publications which highlight recent advances in these fields as well as multidisciplinary developments in the fields of communications, networking, electronics, and applications of machine learning.

an Open Access Journal by MDPI

Editor-in-Chief

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
