Message from the Guest Editors

Dear Colleagues,

Communicating things are ubiquitous. They come in all forms and shapes and carry out many tasks, including sensing, photography, biometrics, and health monitoring, to name but a few. The speed at which this field is growing and the time-to-market attitude induced by fierce competition have caused many developers to cut corners. One of the many issues forced to the backseat is the privacy and confidentiality of transmitted data. Existing ad hoc-based protocols have not resolved this issue, and the lack of a prevalent standard with existing libraries for developers to employ does not alleviate the situation.

This Special Issue solicits papers that address this issue, providing future developers with the protocols they need to secure their communications. This includes (but is not limited to):

- Securing wireless network protocols
- Securing MANET protocols
- Securing VANET protocols
- Securing UAV protocols

an Open Access Journal by MDPI

Editor-in-Chief

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
