

Wireless Sensor Networks Applications in Internet of Things

Guest Editors:

Prof. Dr. Wen-Tsai Sung

Department of Electrical Engineering, National Chin-Yi University of Technology, Taichung City 411030, Taiwan

Prof. Dr. Kuo-Torng Lan

Department of Information Technology, Takming University of Science and Technology, Taipei City, Taiwan

Prof. Dr. Pei-Chi Chen

Department of industrial education, National Taiwan Normal University, Taipei City, Taiwan

Deadline for manuscript submissions:

closed (31 August 2022)

Message from the Guest Editors

Recent research has focused on the need to integrate artificial intelligence, machine learning, blockchain, network security, data analysis, big data, the Internet of Things, and other fast-developing fields to predict methods and technologies to provide real-time solutions to certain problems.

This Special Issue of *Electronics* will focus on the application of soft computing methods in intelligent automation systems, as well as attempts to enhance protection and privacy with complete communication and delivery as blockchain and AI technologies are allowed beyond 5G (B5G). The research emphasis is on incorporating and unifying technologies to produce new and smart networking services and applications as both blockchain and AI advance further.

Keywords

- artificial intelligence
- big data
- blockchain
- cloud computing
- wireless sensor network
- deep learning
- fuzzy logics
- internet of things
- machine learning
- 5G

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
